SUMMARY

Curious, driven, and results-oriented Data Scientist with 2+ years of experience in applying advanced AI, machine learning, and statistical techniques to solve complex business problems. Proficient in Python, Pyspark, statistical analysis, and production-ready code development, with expertise in time series analysis, causal inference, and natural language processing (NLP). Skilled at translating technical insights for non-technical stakeholders and building scalable AI/ML pipelines. Excited to bring my expertise to the team

KEY COMPETENCIES

Technical Skills: Python, R,SQL, Machine Learning, Power BI, NLP, Generative AI(Google Gemini, chatgpt APIs), Docker, CI/CD Pipeline, Azure Databricks, Synapse	Statistical Knowledge: Descriptive Statistics, Inferential Statistics, Regression Analysis, Bayesian Statistics, Time Series Analysis, Experimental Design, Calculus, Linear Algebra, Probability Theory, Optimization.	Soft Skills: Strong interpersonal skills. Proactive and self motivated. Curious and Inquisitive. Exceptional organizational skills, time management, Leadership.

PROFESSIONAL EXPERIENCE

Data Scientist – Associate Consultant	2025 - Present
Marketing Mix Modeling (MMM): Enhanced eCommerce and CPG marketing strategies, optimizing budget allocation for improved ROI and campaign effectiveness. This lead to expand the project scope for other brands. Inventory Stocking Optimization: Improved vending machine stocking accuracy from 59% to 65% using XGBoost, CatBoost, and HyperOpt via MLFlow pipelines. Product Classification using ML :Reduced SKU mapping time from 3 weeks to 1 hour with 90% accuracy using SVM, Logistic Regression, and Gradient Boosting. Client-Centric Dashboard Development : Built interactive dashboards using Flask, tailored to client-specific KPIs and analytics requirements. AI-Powered Geolift Data Standardization : Developed Google Gemini-based models to clean and normalize country/city-level data through intelligent deduplication and mapping. Reduced the time from 4hr to 1hr. Data Extraction via APIs, ETL : ETL Pipelines Scripts PowerPoint Reporting Automation :Streamlined reporting across teams by automating Excel-to-PPT workflows using Python libraries like pptx and openpyxl. Internal Tools & Knowledge Base – Contributed to SQUARES internal platform by developing internal helper tools and building a scalable knowledge base for analytics teams.	
Data Analyst Intern	Jan 2023 - April 2023
Supported the analytics team with ETL scripting, MMM deliverables, and documentation (DRD); conducted research on time series and machine learning algorithms to enhance model accuracy and insights.	

EDUCATION

Masters Degree In Data Science	2021-2023
Vellore Institute Of Technology, Vellore. CGPA: 9.04 - Capstone: Aspect based sentiment analysis of students regrading Indian education system- Conducted survey-based sentiment analysis on education system aspects using TextBlob, clustering, and visualizations with Python (NLTK, sklearn, pandas). - Part time Intern at Chakra Secure Solutions: Web Application for Bulk Upload to API (POSTMAN, Flask)	
Bachelor of Science	2018-2021
Mount Carmel College, Bangalore Capstone: Internet Data Usage Analysis, Web site development for artists	

ADDITIONAL INFORMATION

- Languages:** English, Kannada, Hindi.
- Certifications:** SHORT TERM COURSE OF “SQL”, organized by Department of Mathematics,VIT, Udemy Courses.
- Awards/Activities:**
 - Spot Award** for outstanding work, Analytic Edge, 2023.
 - 1st Place** in Innovative Idea Creation, nominated for IIC National Innovation Contest, Mount Carmel College, 2019.
 - Volunteered at U&I, Bangalore(Awarded **Innovative Teacher**)(2018).
